

Care and Maintenance Guide

Routine Cleaning: Use a soft non-abrasive damp cloth, you may add a very mild liquid soap to your regimen

Rigorous Cleaning: Still using a soft non-abrasive cloth incorporate a neutral PH cleaner, if more stubborn stain try using a non abrasive scrub pad. You may also view Piedrafina Cleaning Products @ www.pfsurfaces.com for convenience and peace of mind.

Warnings: Be aware that most commonly used household cleaning products have a negative effect on marble surfacing. Never expose your Piedrafina Marble to Trichloroethane or methylene which are in products such as paint remover and furniture strippers. When choosing a cleaning agent it is not recommended to utilize a product that has high acid (low PH) or high alkaline (high PH). If accidental exposure to any damaging products should occur, thoroughly rinse the affected area with water as soon as possible.

Note* Be certain to rinse all areas thoroughly when applying any type of cleaning agent. Piedrafina Marble also recommends sealing your countertop on an annual basis. When utilizing a marble sealer carefully follow the manufacturer 's instructions.

*Following the above care and maintenance you will enjoy your
Piedrafina Marble Surfaces for years to come.*
