### STRONG, DURABLE, AND BEAUTIFUL

Our quartz sinks are made from up to 85% quartz (the hardest constituent of granite) and premium acrylic resins. The material is tougher, shines with intensity of color, and is considerably easier to clean than other sinks.

### SILVER ION ANTIBACTERIAL PROTECTION SYSTEM

All of our quartz sinks are food-safe, UV-stable, and finished with our advanced Silver Ion Hygiene System. This natural antibacterial protection inhibits approximately 95% of bacterial growth.
